

Know Before You Go!

1. Verify that the boat (and all safety equipment, blower, etc.) is in good working condition and observe your boat's weight /passenger limits.
2. Comply with state law that requires MC #'s and up to date registration stickers.
3. Be sure that there is at least one life jacket for each person on board.
4. Water skiers, wake boarders, surfers, Stand Up Paddlers (SUPs), etc., must wear a PFD.
5. You must have a spotter on board and a mirror when towing a person(s).
6. Be sure to have a throw cushion, fire extinguisher, grab hook, etc. just in case.
7. Know that it is *illegal* to operate a watercraft while intoxicated or under the influence of drugs. A BUI will impact driving record.
8. Be sure the way is clear before you take off. A boat already underway has the right of way.
9. Operate all watercraft counter clockwise around the lake.
10. Know the "rules of the road". For example, sailboats have the right of way. Boats to the right have the right of way.
11. Do not create an unnecessary wake for other boaters, fisherman, skiers, etc. The captain is responsible for his/her boat and its wake.
12. No riding on the bow edge or transom.
13. Bays are no wake areas.
14. Keep the proper distance from other boaters, docks, swimmers, rafts and shorelines while underway. Lake Angelus regulations require a 200-foot space. That's about 10 ski boatlengths.

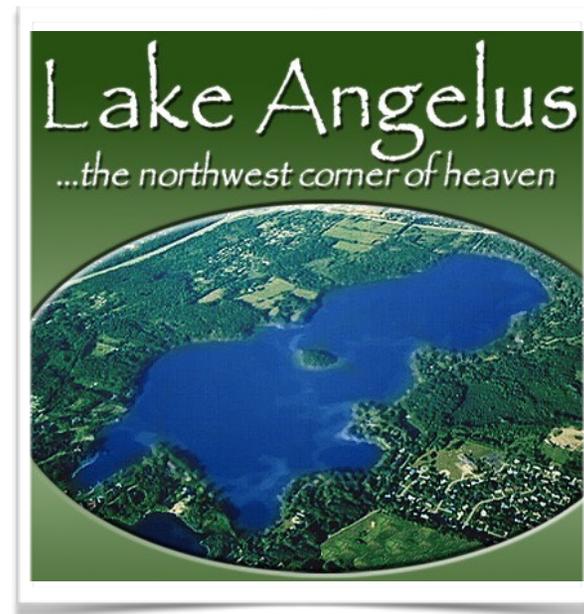

Additional Reminders

Always:

- Observe the time restrictions and respect people's quiet time.
- NO wake after 8 pm and before 9 am from Memorial Day through Labor Day.
- Boats operating after dark must have navigation lights. Docking lights are for docking only.
- Do not discharge oil/gas, etc., into the lake
- Stay alert to fallen skiers, tubers, surfers and turn engine off when they are near the prop.
- Swimmers, snorkelers, skin divers should be cautious in the middle of the lake. BE SEEN!

More to do...

- Review Lake Angelus Boating and Safety Rules in their entirety at lakeangelus.org
- Stay current with boater safety courses.

Lake Angelus

Boating Rules and Regulations

Highlights

2018

Type I Life Jackets

An **off shore life jacket** is suited to all waters ~ especially open, rough waters, where a rescue can easily be delayed.

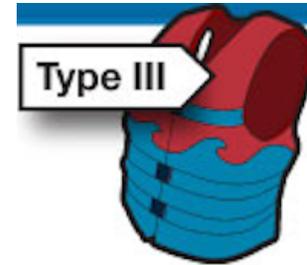

Type II Life Jackets

The **near shore life jacket** is best suited to calm inland waters where there is a good chance of an easy rescue.

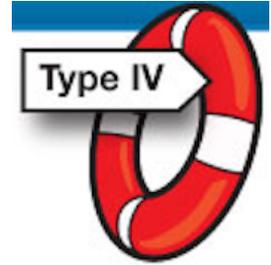

Type III Life Jackets

Flotation Aids come in a wide variety of styles ~ but basically possess the same buoyancy as a Type II.

Type IV Throwable

A **throwable device** is required on any boat 16 feet or over and must be *immediately available* onboard.

Your PFD must
fit properly to work properly...

- To ensure the proper fit ~ have the wearer put on the PFD and adjust straps as necessary to ensure a snug fit.
- A properly fitted PFD will not ride higher than the ears or mouth of the wearer.
- Test PFDs in the water to ensure they can hold your weight. You should get used to swimming with a PFD.
- **A PFD is only effective if you are wearing one!**

Visit the U.S. Coast Guard Auxiliary @ www.cgaux.org

Communication is key...

Towed water sports can be fun, but noisy...

Everyone on board, as well as the person being towed, has to use hand signals to communicate their intentions. Memorize proper hand signals for:

Return to Dock ~ pat your head with your right hand

Rider Okay ~ hold hands together over your head

Rider Down ~ hold up your ski or wake board for greater visibility

Speed Up ~ thumb up

Slow Down ~ thumb down

Stop ~ flat hand drawn across front of neck

HIGH-IMPACT SPORTS require a Type I, II or III PFD. Never engage in towed water sports in an inflatable PFD ~ ever!
